

How to remember 5<sup>th</sup> (Mixed) mutations.

**B**ig **F**eet

**M**assive **F**eet

**D**on't **T**read

**G**ently **H**ere

So no **G**race nor **G**lamour

But remember if it **G**oes **W**ild in 2<sup>nd</sup> mutation

**H**ard **W**ork is needed with the 5<sup>th</sup>.

Explanation:

"no **G**race nor **G**lamour": G changes to H, but not for Gr or Gl.

"**G**oes **W**ild in 2<sup>nd</sup> -> **H**ard **W**ork in 5<sup>th</sup>": In additions, for all the cases where G changes to W with a 2<sup>nd</sup> mutation, it will change to Hw with a 5<sup>th</sup> mutation.
